

The plot displays the following data series:

- TD Data:** Red 'x' marks representing data points for the TD model.
- TD Output Data:** Green circles representing the output data for the TD model.
- MR1 Data:** Blue 'x' marks representing data points for the MR1 model.
- MR1 Output Data:** Orange circles representing the output data for the MR1 model.
- TD Intersection Point:** A large green circle at the origin (0,0).
- MR1 Intersection Point:** A large purple circle at the origin (0,0).

The X Axis is labeled from 0 to 14. The Y Axis is labeled from 0 to 14. The legend in the top-left corner identifies the data series. The plot shows that MR1 data points are more widely distributed and follow a more linear trend compared to TD data points, which are concentrated at lower values.
