

Figure 1 is a plot showing the normalized output of the TD and MR2 models. The x-axis represents the normalized input (0 to 10) and the y-axis represents the normalized output (0 to 10). The plot displays two sets of data: TD Data (red 'x' marks) and MR2 Data (blue 'x' marks). The TD Output Data is represented by a green line with circular markers, and the MR2 Output Data is represented by an orange line with circular markers. The TD Intersection Point is marked with a large green circle at (9.00, 4.06), and the MR2 Intersection Point is marked with a large purple circle at (1.60, 7.27).
